

# STRATEGIES FOR BOOSTING PROFIT AND MANAGING RISK

## risk and profit improvement audit

ADI's expertise will analyze historical and potential claims patterns within your equipment data. From there you will have an extensive analysis of the performance of your current program:

- Adequacy of reserves
- Claim patterns
- Reserve earning patterns
- Problem models, parts, attachments
- Lost cost per policy
- Repair vs. replace opportunities
- Price/Profit optimization design

*By analyzing this information, ADI will develop a tailored program to deliver and optimize customer satisfaction and profits.*

**Warranty Connect is a warranty software system designed to automate the warranty process & streamline efficiencies**

**We'd like to PROVE to you that we've got all your answers.**
